PERSPECTIVE VIEW

NOT TO SCALE

IMPORTANT NOTES:

- Maximum crossfall for the kerb ramp is to be 1:8 to comply with Australian Standard 1428.
- Minimum compressive strength of concrete shall be 25MPa at 28 days.
- All footpath adjustments shall be in accordance with Council's footpath specification SD 5 and SD6 and to Council's satisfaction.
- The ramp and the sloping sides should be slip resistant.
- Pram ramp must be aligned in the direction of travel across the road with the ramp on the far side.
- Concrete pour must take place within 2 working days of excavation.
- Should existing infrastructure be damaged, it must be reinstated to Council's satisfaction.
- Existing adjacent infrastructure must match the footpath.
- Excavated materials shall be removed from site when excavated.
- The contractor shall provide all regulatory signs and warning devices for the protection of the public in accordance with Road Traffic Act and Occupational Health and Safety Act.
- Should the road pavement/water table/kerbing be damaged, it must be reinstated to Council's satisfaction.
- Permits must be obtained from Council to seek approval of location and levels prior to any excavation.
- Once approved, the works are required to be carried out to Council's specification and during the course of the construction the property owner/contractors must ensure that the site is safe for pedestrian and users of the road.
- Undertaking works without a permit under Local Government Act 1999 and the Development Act 1993 may result in the imposition of a fine.
- Owner is responsible for contacting Dial before You Dig on 1100 to locate any services on or under the verge prior to excavating.
- Changes to services need to be organised with the relevant utilities at owners expense.
- Council reserves the right to repair any damage to Council's assets or to replace any unsatisfactory work at owners expense.
- Please ring Council on 08 8366 9222 to arrange for inspection.
